Conner Weber

Conner was 20 years old when he started working for JRT and said he choose plumbing because he wanted to do something fun and make a career out of it. His first leadership position was the Green River Filtration Facility to help finish the project. When asked if he had any good memories of working here, he replied, "there have been many different memoires made here, a lot of friendships and great experiences!
Conner is currently working on Project Beige with Bryan Massie & Jackson Lee and just finished up a ground work at IPT Lakewood Building 5. He said the best part of his job is the great people and he is always learning. A typical work day consists of waking up and going to work. He said his top work related goal this year is to get Project Beige completed.

Conner grew up with his twin brother Christian, who is also a foreman here at JRT. We wanted to know what it was like having a twin and Conner said they did pretty much everything together & always had each others backs.

Conner and his wife Tiffany have been married for almost 9 years and have 4 children. Their oldest are identical twin 7 year old girls, a 3 year old girl and 1.5 year old boy. They are also expecting another baby!

When asked about his hobbies Conner said he is currently building a house so he doesn't have much time for hobbies at the moment but after he is done building he would like to ride his dirt bike and start doing some more traveling with his family.

EMPLOYEE OF THE MONTH

Joren Sarkinen

Joren is always looking for any way that he can help improve JRT's processes and flat out cranks through the work. Just an all round superstar!

- Sven Johnson

Joren brings great value to the team! Not only is he thorough with details & looking ahead, he really knows how to use technology! I really enjoy working with him & having him teach me how to use and make formulas in sheets!

- Ron Bergmann

Work Anniversary's

DONNA REDINGER	

Productivity tip for April

Logan Raisanen has built a blue beam tool box and template for drawing and ordering duct. This system can be used with hand drawings, along with quick tools to draw on Bluebeam. We plan to set up a HVAC drawing class to share this system. Thanks Logan!

Send in any of your ideas that we can share to increase production to Ron Bergmann 360-903-2742 or ronb@jrtmechanical.com. If your idea is selected in a future newsletter, you will receive $50 dollars in cash.

SAFETY

- We know everyone is quite busy, just a quick reminder if you are in need of safety items, please go through your foreman. Your foreman can get those requests passed to Randon. This saves everyone time and keeps the communication from getting lost.
- We plan to have all foreman CPR/First Aid/AED trained by the end of May.
- We plan to have a supervisor drug/alcohol awareness training sometime in the near future, the training date will be sent out.
